-I- PTM: THE C-TERMINAL DOMAIN DISPLAYS AN AUTOPROTEOLYSIS ACTIVITY AND A CHOLESTEROL TRANSFERASE ACTIVITY. BOTH ACTIVITIES RESULT IN THE CLEAVAGE OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHENT OF A CHOLESTEROL MOLETY TO THE C-TERMINAL OF THE NEWLY&GENERATED N-TERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (BY SIMILARITY).

-I- DISCASE: DEFECTS IN SHH ARE THE CAUSE OF THE AUTOSOMAL DOMINANT DISCASE: DEFECTS IN SHH ARE THE CAUSE OF THE AUTOSOMAL DOMINANT DISCASE: DEFECTS THAT AFFECTS THE MIDLINE DEVELOPMENT OF THE FOREBRAIN AND MIDFACE. HPE IS ASSOCIATED WITH SEVERAL DISTINCT FACIES AND PHENOTYPIC VARIABILITY. IN THE MOST EXTREME CASES, ANOPHTHALMIA OR CYCLOPIA IS EVIDENT ALONG WITH A CONGENITAL ABSENCE OF THE MATURE NOSE. THE LESS SEVERE FORM FEATURES FACIAL DYSMORPHIA CHARACTERIZED BY OCCULAR HYPERTELORISM, DEFECTS OF THE UPPER LAILOR WITH A CONGENITAL DEPERT ALONG WITH A CONGENITAL DEPERT AND/OR NOSE, AND ABSENCE OF THE OLFACTORY NERVES OR CORPUS CALLOSIM

PATIENNING EVENIS DURING DEVENOUSED IN ENDOUGH PRACEDOR. WHICH FUNCTIONS IT ASSOCIATION WITH SMOOTHERED (SMO), TO ACTIVATE THE TRANSCRIPTION OF TARGET GENES. IMPLICATED IN ENDOCHONDRAL OSSIFICATION. MAY REGULATE THE BALANCE BETWEEN GROWTH AND OSSIFICATION OF THE DEVELOPING BONES. INDUCES THE EXPRESSION OF PARATHYROID HORMONE-RELATED PROTEIN (PTHRP) (BY SIMILARITY).

1. SUBCELLULAR LOCATION: THE C-TERMINAL PEPTIDE DIFFUSES FROM THE CELL SURFACE. IS ALSO SECRETED IN ETHIER CLEAVED OR UNCLEAVED FORM TO MEDIATE SIGNALING TO OTHER CELLS (BY SIMILARITY).

1. TISSUE SPECIFICITY: EXPRESSED IN EMBRYONIC LUNG, AND IN ADOLT KINNEY AND LIVER.

1. PIM: THE C-TERMINAL DOMAIN DISPLAYS AN AUTOPROTEOLYSIS ACTIVITY AND A CHOLESTEROL TRANSFERASE ACTIVITY. BOTH ACTIVITIES RESULT IN THE CLEAVED OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHMENT OF A CHOLESTEROL MOIETY TO THE C-TERMINAL OF THE NEWLY GENERATED NETERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (SIMILARITY).

1. SIMILARITY: BELONGS TO THE HEDGEHOG FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gastler J.M., Epstein D.J., Gilbert D.J., Copeland N.G., Seidman C.                                                                                                                                                                                                                                                                                                       and PTH-related protein.";

Science 273:613-622(1996).

Science 273:613-622(1996).

FUNCTION: INTERCELLULAR SIGNAL ESSENTIAL FOR A VARIETY OF PURCTION: INTERCELULAR SIGNAL ESSENTIAL FOR A VARIETY OF PATTERNING EVENTS DURING DEVELOPMENT. BINDS TO THE PATCHED (PT RECEPTOR, WHICH FUNCTIONS IN ASSOCIATION WITH SMOOTHENED (SMO) ACTIVATE THE TRANSCRIPTION OF TARGET GENES. IMPLICATED IN ENDOCHONDRAL OSSIFICATION: MAY REGULATE THE BALANCE BETWEEN GRAND OSSIFICATION OF THE DEVELOPING BONES. INDUCES THE EXPRESSI OF PARAMYROID HORMONE-RELATED PROTEIN (PTHRP).

-!- SUBCELLULAR LOCATION: THE C-TERMINAL PEPTIDE DIFFUSES FROM THE CELL, WHILE THE N-TERMINAL PEPTIDE REMAINS ASSOCIATED WITH THE CELL, SURFACE. IS ALSO SECRETED IN EITHER CLEAVED OR UNCLEAVED
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gallus gallus (Chicken).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         73
     TO MEDIATE SIGNALING TO OTHER CELLS (BY SIMILARITY).

TISSUE SPECIFICITY: EXPRESSED IN DEVELOPING MIDGUT, LUNG AND CARTILAGE OF DEVELOPING LONG BONES IN THE LIMB.

PTM: THE C-TERMINAL DOMAIN DISPLAYS AN AUTOPROTECLYSIS ACTIVITY AND A CHOLESTEROL TRANSPERASE ACTIVITY. BOTH ACTIVITIES RESULT IN THE CLEAVAGE OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHMENT OF A CHOLESTEROL MOIETY TO THE C-TERMINAL OF THE NEWLY GENERATED N-TERMINAL OF THE NEWLY GENERATED N-TERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE

PATTERNING EVENTS DURING DEVELOPMENT. BINDS TO THE PATCHED (PTC)
PATTERNING EVENTS DURING DEVELOPMENT. BINDS TO THE PATCHED (PTC)
RECEPTOR, WHICH FUNCTIONS IN ASSOCIATION WITH SMOOTHENED (SMO), TO
ACTIVATE THE TRANSCRIPTION OF TARGET GENES. IMPLICATED IN
ENDOCHONDRAL OSSIFICATION: MAY REGULATE THE BALANCE BETWEEN GROWTH
AND OSSIFICATION OF THE DEVELOPING BONES. INDUCES THE EXPRESSION
OF PARATHYROID HORMONE-RELATED PROTEIN (PTRR).

-I- SUBCELLULAR LOCATION: THE C-TERMINAL PEPTIDE DIFFUSES FROM THE
CELL, WHILE THE N-TERMINAL PEPTIDE REMAINS ASSOCIATED WITH THE
CELL, SURFACE. IS ALSO SECRETED IN EITHER CLEAVED OR UNCLEAVED FORM
TO MEDIATE SIGNALING TO OTHER CELLS (BY SIMILARITY).

-I- TISSUE SPECIFICITY: IN THE EMBRYO, DETECTED IN THE DEVELOPING GUT,
THE GROWTH ZONE OF CARTILAGE OF DEVELOPING LONG BONES, EPITHELIUM
AND UROGENITAL SINUS. IN THE ADULT KIDNEY, FOUND IN PROXIMAL
CONVOLUTED AND PROXIMAL STRAIGHT TUBLLE.

-I- DEVELOPMENTAL STAGE: DETECTED AT 10 DAYS POST COITUM (DPC) IN
DEVELOPMENTAL STAGE: DETECTED AT 10 DAYS POST COITUM (DPC) IN
DEVELOPING GUT, AT 14.5 DAYS DPC IN THE CARFILLAGE PRIMORDIUM AND
IN THE DEVELOPING UROGENITAL SINUS. EXPRESSION INCREASES WITH
ADDITIONAL AGE IN KIDNEY AND DUODENUM, BECOMING MAXIMAL IN
ADDITIONAL AGE IN KIDNEY AND DUODENUM, BECOMING MAXIMAL IN

                                                                                                                                                               PTM: THE C-TERMINAL DOMAIN DISPLAYS AN AUTOPROTEOLYSIS ACTIVITY AND A CHOLESTEROL TRANSFERASE ACTIVITY. BOTH ACTIVITIES RESULT IN THE CLEAVAGE OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHMENT OF A CHOLESTEROL MOZETY TO THE C-TERMINAL OF THE NEWLY GENERATED N-TERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL STRUCE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANCE SIGNALING, WHEREAS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (BY SIMILARITY).

TISSUE SPECIFICITY: EXPRESSED IN THE VENTRAL MIDLING OF THE NEURAL TUBE AND BRAIN. IN THE DEVELOPING BRAIN, EXPRESSION OCCURS IN DOMAINS THAY INCLUDE A DISCRETE REGION IN THE FLOOR OF THE DENCEPHALON. NOT DETECTED IN THE NOTOCHORD OR DEVELOPING FIN BUD.

THE C-TERMINAL DOMAIN DISPLAYS AN AUTOPROTEOLYSIS ACTIVITY AND A CHOLESTEROL TRANSFERASE ACTIVITY. BOTH ACTIVITIES RESULT IN THE CLEAVAGE OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHMENT OF A CHOLESTEROL MOLETY TO THE C-TERMINAL OF THE NEWLY GENERATED N-TERMINAL FRAMENT (N-PRODUCT). THIS COVALENT MODIFICATION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (BY SIMILARITY).
                                                                                                                                                                                                                                                                                                                                                                                                                 BINDING

                                                                                                                                                                                                                                                                                                                                TERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (BY SIMILARITY).

SIMILARITY: BELONGS TO THE HEDGEHOG FAMILY.

SIMILARITY)

-!- SUBCELLULAR LOCATION: THE C-TERMINAL PEPTIDE DIFFUSES FROM THE CELL, WHILE THE N-TERMINAL PEPTIDE DIFFUSES FROM THE CELL, WHILE THE N-TERMINAL PEPTIDE REMAINS ASSOCIATED WITH THE CELL SURFACE. IS ALSO SECRETED IN EITHER CLEAVED OR UNCLEAVED FORM TO MEDIATE SIGNALING TO OTHER CELLS (BY SIMILARITY).

-!- TISSUE SPECIFICITY: EXPRESSED IN THE VENTRAL MIDLINE OF THE NEURAL TUBE AND BRAIN. ALSO FOUND IN THE NOTOCHORD AND IN DEVELOPING FIN BUD. IN THE DEVELOPING BRAIN, EXPRESSION OCCURS IN DOMAINS THAT INCLUDE A DISCRETE REGION IN THE FLOOR OF THE DIENCEPHALON.

-!- DEVELOPMENTAL STAGE: FIRST DETECTABLE IN THE INNER CELL LAYER OF THE EMBRYONIC SHIELD DURING GASTRULATION. BY 9.5 HRS OF DEVELOPMENT, EXPRESSED IN A CONTINUOUS BAND THAT EXTENDS FROM THE EMBRYONIC SHIELD DOMAIN BY 19.5 HRS OF PRESCOMPTIVE THE ANTESIOR BOUNDARY OF EXPRESSION BEING POSITIONED IN THE CENTER OF THE ANIMAL POLE ANTERIOR TO THE PRESCOUT IN THE CLEAVAGE OF THE PUBLICANIAN AUTOPROTEOLYSIS ACTIVITY AND A CHOLESTEROL MOIETY TO THE C-TERMINAL OF THE NEWLY GENERATED N-TERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. THE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE SIMILARITY: BELONGS TO THE HEDGEHOG FAMILY.

SIMILARITY SUBCELLULAR LOCATION: THE C-TERMINAL PEPTIDE DIFFUSES FROM THE CELL, WHILE THE N-TERMINAL PEPTIDE REMAINS ASSOCIATED WITH THE CELL, WHILE THE N-TERMINAL PEPTIDE REMAINS ASSOCIATED WITH THE CELL SURFACE. IS ALSO SECRETED IN EITHER CLEAVED OR UNCLEAVED FORM TO MEDIATE SIGNALING TO OTHER CELLS (BY SIMILARITY).

1 TISSUE SPECIFICITY: STONGLY EXPRESSED IN NOTOCHORD AND NEURAL FLOOR PLATE DURING EMBRYOGENESIS. IN TADPOLE, HIGH EXPRESSION IS OBSERVED IN PANCREAS/STOMACH, MODERATE EXPRESSION IN TAIL, AND LOW EXPRESSION IN INTESTINE, BRAIN, AND HIND LIMB.

1 DEVELOPMENTAL STAGE: FIRST DETECTED AT THE NEURULA (STAGES 16-17).

FIRST PEAK OF EXPRESSION AROUND TADPOLE HATCHING (STAGES 33-40).

HIGH EXPRESSION OBSERVED IN INTESTINE AT THE CLIMAX OF MORPHOGENESIS (STAGES 60-62) WHEN INTESTINE EPITHELIAL UNDERGOES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Restrictions to floor plate induction by hedgehog and winged-helix genes in the neural tube of frog embryos.";

Mol. Cell. Neurosci. 6:106-121(1995).

-I- FUNCTION: INTERCELLULAR SIGNAL ESSENTIAL FOR A VARIETY OF PATTERNING EVENTS DURING DEVELOPMENT AND METAMORPHOSIS. INVOLVEL IN LIMB FORMATION, PATTERNING OF THE CENTRAL NERVOUS SYSTEM AND INTERCED TO THE CENTRAL NER

BOTH ACTIVITIES RESULT IN THE CLEAVAGE OF THE FULL-LENGTH PROTEIN AND COVALENT ATTACHEST OF A CHOLESTEROL MOIETY TO THE C-TERMINAL OF THE NEWLY GENERATED NOTERMINAL FRAGMENT (N-PRODUCT). THIS COVALENT MODIFICATION APPEARS TO PLAY AN ESSENTIAL ROLE IN RESTRICTING THE SPATIAL DISTRIBUTION OF THE PROTEIN ACTIVITY TO THE CELL SURFACE. HE N-PRODUCT IS THE ACTIVE SPECIES IN BOTH LOCAL AND LONG-RANGE SIGNALING, WHEREAS THE C-PRODUCT HAS NO SIGNALING ACTIVITY (BY SIMILARITY).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Pred. No. is the number of results predicted by chance to h score greater than or equal to the score of the result bein and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              protein search, using sw model
